

HEIGHT-ADJUSTABLE  
**MACHINE BASE**

**BUILT**

[www.builtsystems.net](http://www.builtsystems.net)

The modularity of BUILT machine bases brings better rigidity, flexible reassembly and ergonomic support to your team's production process.

These bases are constructed with leading steel fabrication machines by our team of ergonomic experts, using a patented design process. Our in-house model and one-piece flow method of production not only result in superior craftsmanship, but also lower the cost per part for our customers and provide high economic return over the life of each product.

**BUILT MB1200 and MB3500 Specifications: Electric**

Model	Lift Capacity	Height Range	Depths	Size Width	Drive Type	Stroke
MB1200	1200 lbs.	26½"-37½"	24-30-36	48, 60	Electric	11"
