

Sunnex CM Anti-vibration mount

Facts

- **Withstands loads up to 4000 kg per machine mount**
- **Damping machine mount for machines with built in levelling screws**
- **Very low installation height**

SUNNEX CM is a machine mount that is designed to have a stabilizing and damping effect on installations of engineering machinery, scales and unsteady equipment.

The design consists of a pressure plate made of galvanized sheet steel, which rests on a anti-vibration base element of impervious rubber. This simple yet functional design gives the Sunnex CM a very low installation height and a long service life, which makes it a very cost effective option.

Application areas

- **Engineering machinery**
- **Scales**

Model	Load area per mount daN (kg)	D mm	H mm	Part no.
CM 80	50–500	80	20	10441
CM 120	400–1000	120	24	10442
CM 160	800–2000	160	29	10443
CM 200	1500–4000	200	33	10444
